

## COMPENDIUM OF ELECTRICITY TRANSMISSION REGULATORY GUIDELINES

---

A USER-FRIENDLY COMPENDIUM OF ELECTRICITY REGULATORY GUIDELINES TO HELP INDUSTRY UNDERSTAND THE RULES GOVERNING REVENUE DETERMINATIONS WAS ISSUED BY THE AER IN AUGUST 2005.

---

AER Chairman, Mr Steve Edwell, said:

The guidelines will evolve in consultation with industry participants and energy users. The compendium will be updated accordingly ... The issuing of the compendium is the first step towards fostering an environment in which service providers and other interested parties can predict the outcomes of AER processes through the application of a clear and transparent set of guidelines detailing the AER's regulatory approach.

The compendium includes:

- > the statement of principles for the regulation of electricity transmission services
- > the regulatory test
- > service standards guidelines
- > guidelines for the negotiation of discounted transmission charges
- > transmission ring fencing guidelines
- > information requirements guidelines
- > the post-tax revenue model and a handbook explaining the model.

The compendium is available on the AER website at [www.aer.gov.au](http://www.aer.gov.au) or from the ACCC Infocentre, phone 1300 302 502.
